EDUCATION

PES University

Bachelor's in Technology, Computer Science, AIML

Bangalore, India

August 2023 – June 2027

Skills

Programming: Python, C, HTML, CSS, JavaScript, TypeScript, jQuery, React.js, Next.js, Electron.js, Node.js, Express.js, Flutter, MongoDB, Firebase, SQL, MySQL, Postgres, Prisma, TypeORM, Sockets, Git, MATLAB, Dockerfile, Verilog, Assembly, Flask, FastApi, Ollama, OllamaApi, Linux, Debian, AWS, Cloudflare.

DevOps: Docker, Containerization, Git, GitHub, GitLab, Github Actions.

WORK EXPERIENCE

Full Stack Developer Intern

SKaaS - Skills as a Service

Bangalore, India

April 2026 - July 2026

- Built an AI based interview platform using Next.js, featuring meeting rooms with audio and video recording, in-browser collaborative code editor and whiteboard, and reports linking questions to timestamped points in the recording.
- Designed an AI Agent in Python using the LiveKit SDK, capable of autonomously conduct entire interviews or passively transcribe sessions, using real-time speech processing, and auto-generate performance reports giving important insights such as candidate strengths and weaknesses, overall candidate scores benchmarked against other candidates for the same role.
- Containerized and deployed everything on an AWS EC2 instance, using S3 Buckets for video storage and Cloudfront as a Content Delivery Network to serve meeting recordings.

Teaching Assistant

PES University

Bangalore, India

August 2025 - May 2026

- Served as a Teaching Assistant for the Web Technologies Course at PES University. The course covered the basics of web development and the MERN stack. Also **created an extensive [Documentation Website for the MERN stack for developers](#)** to learn and refer from.
- Served as a Teaching Assistant for the Design and Analysis of Algorithms Course at PES University. Strengthened practical algorithm application by organizing four HackerRank coding challenges for **120+ students** and designing a semester-long programming project, including topics such as divide-and-conquer, greedy algorithms, dynamic programming, and graph traversal (DFS/BFS, Dijkstra's).

Machine Learning Research Intern

PI Labs, PES University

Bangalore, India

June 2025 - July 2025

- Researched about Rule-Based, Machine Learning Approaches for Rooftop Solar Suitability Mapping, in selected wards of Bangalore, India, and wrote a research paper about the topic.

Subject Matter Expert

PESU IO, PES University

Bangalore, India

August 2025 – December 2025

- Curated and taught the Full Stack Developer Bootcamp Course at PESU I/O.
- Mentored over **60 students** through the MERN stack curriculum, during hands-on sessions.
- Topics covering frontend fundamentals (HTML, CSS, JavaScript) to advanced React concepts (Hooks, Context API), Tailwind CSS, and complete backend development with Node.js and MongoDB, providing full MERN stack training.

PROJECTS

Trailo | Trip Management App | [\[Live\]](#)

- **Technologies:** Linux Debian, Flutter, Next.js, Node.js, Express.js, PostgreSQL (NeonDB), Google Maps SDK, Self-hosting.
- A collaborative platform designed to simplify group trip coordination for people on their road trips, with features such as real-time location sharing, route planning, voice calls, safety alerts, image journaling and other trip organisation tools.
- Implemented the Flutter Mobile App, Discord Bot and Next.js Website (including SEO, and optimisation). Also developed the backend server which serves all 3.
- Self-hosted the Website, Discord Bot, and Backend server on a Linux Machine using CloudFlare Tunnel and DNS tools.
